PREFACE.

READ THIS.

We take pleasure in presenting to the public our newly revised and indispensable ATLAS MAP street guide to Chicago, giving a complete and accurate list of all streets, showing newly revised numbers, streets upon which car lines are operated. Under the heading of Index, figures shown in column after Street Numbers indicate the PAGE upon which map will be found, showing street openings, interruption and jogs in street lines. Street Car Lines reaching respective nearest corners are shown.

LIST OF STREET CAR LINES ROUTED UP TO DATE OF PUBLICATION WILL BE FOUND ON PAGE 63.

A corrected list of all streets renamed since August 15, 1913, up to and including April 1, 1916.

Under the Chicago numbering system the streets are so numbered to correspond on all streets running parallel, making it easy to locate any number. South and East front have been allotted the even numbers.

MADISON STREET is used as the base or dividing line for all streets running north and south beginning with North 1 at north line of Madison street and increasing toward the north. One hundred numbers to the block of one-eighth mile. The prefix South is used commencing with No. 1 at the south line of Madison street and increasing toward the south. One hundred numbers to the block of one-eighth mile.

STATE STREET is used as the base or dividing line for all streets running east and west, beginning with East 1 at the east line of State street and increasing toward the east; and with West 1 at the west line of State street and increasing toward the west. One hundred numbers to the block of one-eighth mile.

No prefixes will be used on any streets which are open only on one side of either of the base or dividing line streets, such as Loomis street on the West Side, open only south of Madison street, or Fullerton avenue on the North Side, open only west of State street. Numerical titled streets south of Madison are excepted from this rule.

EXAMPLE.

To find a number, for instance, 7619 Rogers Av., turn to the Index to Streets and to Rogers Av. and the number desired being between the first and last numbers given, refers to page four (4), place your finger at the right of page and draw an imaginary line up the page to a point opposite N. 7600 and then to the left to Rogers Av. You can observe the surrounding layout of streets, etc., with transportation lines, which are shown thus:

Heavy black line, ————— Steam Railroads.

Dash, dot, dash, dot, — • — • — • — • — • — Elevated Railroads.

Dashes with space between, — — — — — Surface Railways.

To find the continuation of any street or locality refer to numbers given upon the margin of the page.

EXPLANATORY.

The following explanation is offered to enlighten the general public on the street renaming scheme or plan which governed the street Nomenclature Committee of the Chicago City Council in the changes of street names adopted August 15th, 1913.

With the addition to the City of the various Townships, annexed from time to time, many of their streets bearing the same names as those already within the City's limits, the necessity arose for the elimination of the duplicated names. With this object in view, and new street names being necessary, the scheme developed for the assignment of names in a systematic manner, hence the following plan was proposed and adopted and new names were assigned accordingly, with but few exceptions:

All streets to bear names arranged in alphabetical order commencing with the letter A in the first mile, B in the second mile, etc.

Effecting North and South streets the extreme East End of the City was used as the starting point, this being the Indiana State Line, at 134th St., the re-named streets in the first mile were assigned names commencing with the letter A, in the second mile B, third C, and so on, extending Westward to Edison Park, which is fifteen miles West of the East limits of the City, the new names here commencing with the letter O. On all East and West streets South of 12th St., where names bear numerical numbers, the plan was not made operative. Those streets lying between Madison and 12th St., with the exception of a few in the downtown district, were left unchanged and are open to future action should the scheme be made effective to cover the entire City. On East and West streets North of Madison where new names were assigned, the plan was made operative to commence with the letter A in the first mile between Madison St. and Chicago Ave., B in the second mile, C in the third, etc.

In 1909 a new house numbering plan was adopted by the City and all street frontage numbers outside the downtown Loop were changed. The basis of the plan is:

One number to every 20 foot frontage.

One hundred numbers to the block of one-eighth of the mile.

Eight hundred numbers to the mile.

On April 1st, 1911, new numbers were assigned to the street frontage in the downtown Loop. The changes were made to correspond with the plan adopted in 1909. As a result of this numbering system we are now enjoying a much improved condition. All streets running in the same direction carry the same or corresponding number at all points of the city. For example:

1438 Howard St. in Rogers Park is $1\frac{3}{4}$ miles and 380 feet West of the Base line (State St.).

1438 W. Madison St. on the West Side is $1\frac{3}{4}$ miles and 380 feet West of the Base line (State St.).

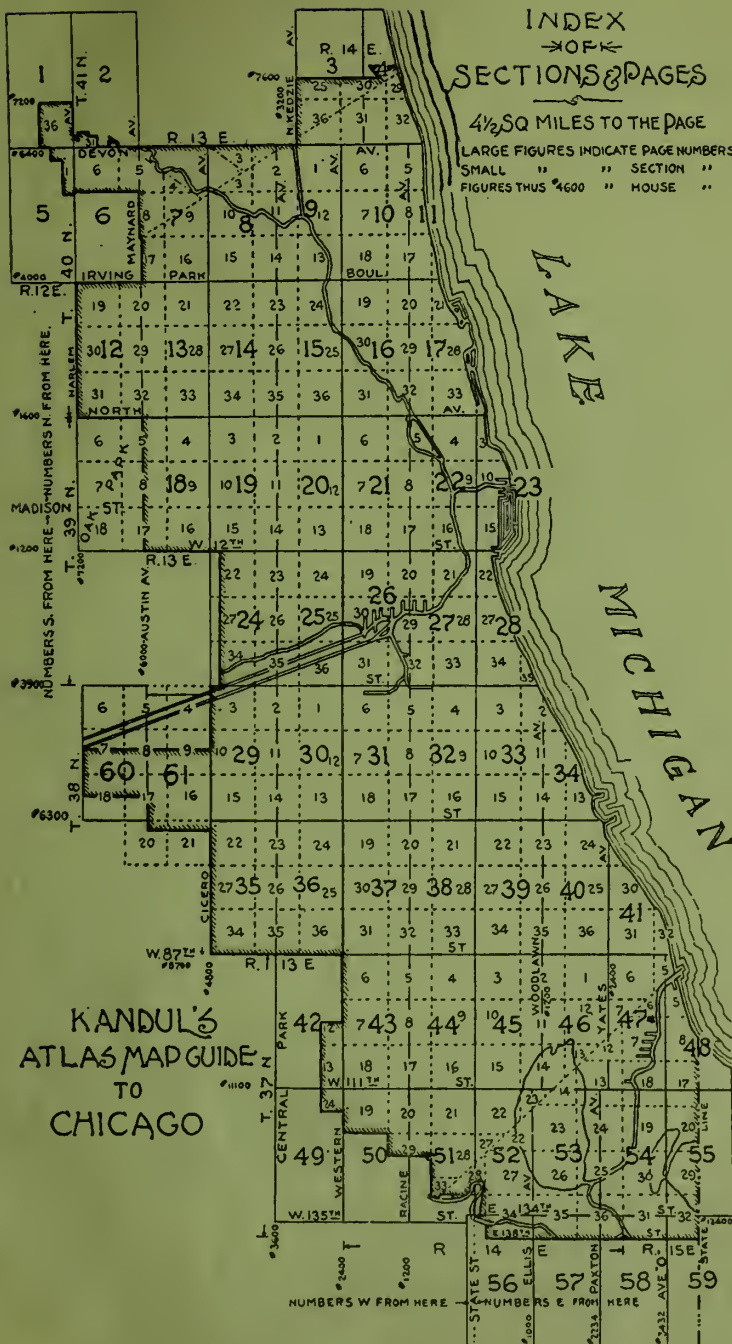

1438 W. 63d St. in Englewood is $1\frac{3}{4}$ miles and 380 feet West of the Base line (State St.).

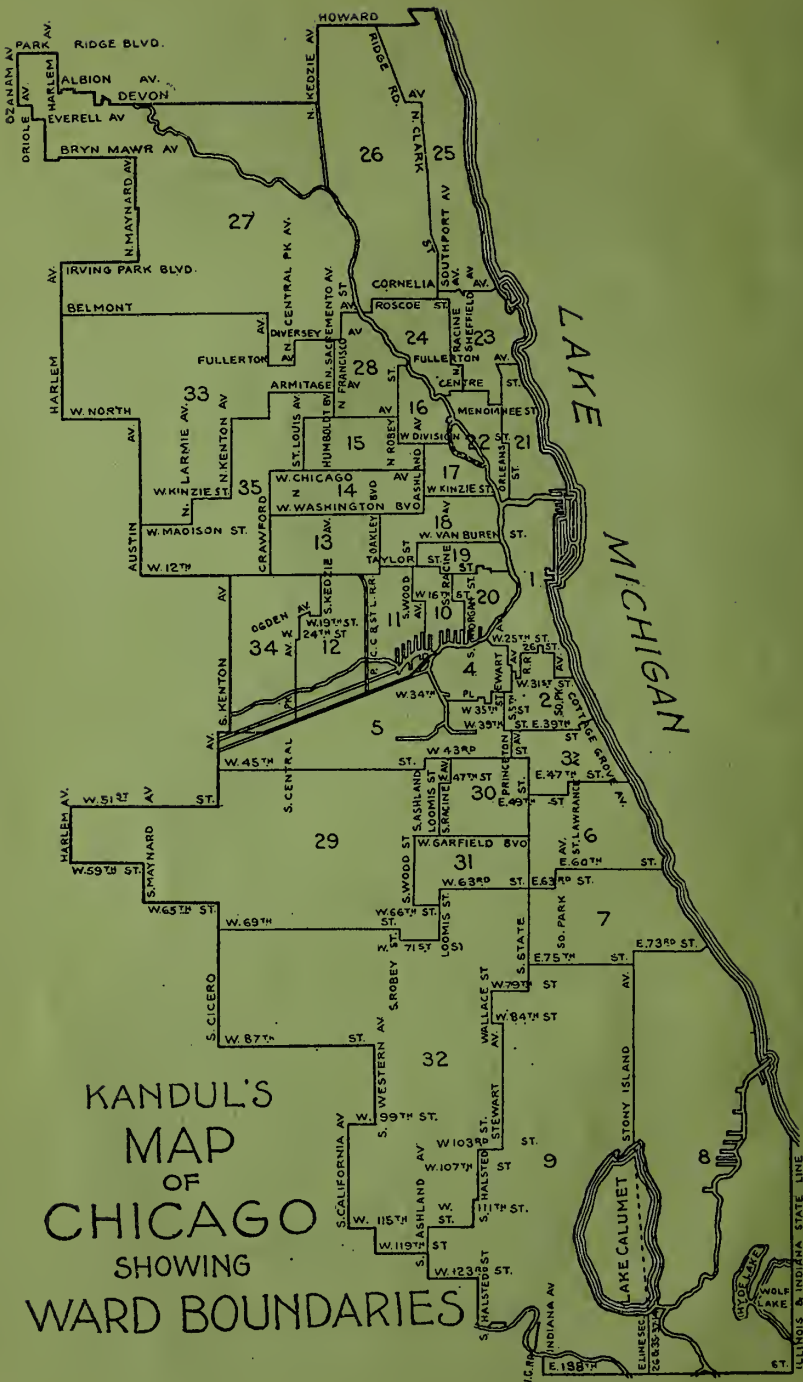

With the application of the new street name scheme it is possible to establish the distance to where the street is located by the first letters of the name it bears; for example:

Should you wish to locate number 6435 N. Laramie Av.—the letter L indicates that the street lies in the twelfth mile West of the East Limits of the city and the number, divided by 8 (eight hundred numbers to the mile), shows 8 miles North of the base line for dividing North and South streets (Madison). The number 35 being allotted to the twenty foot of street frontage lying 350 feet North of the commencing hundred number. Thus the street name and number indicate their exact location.

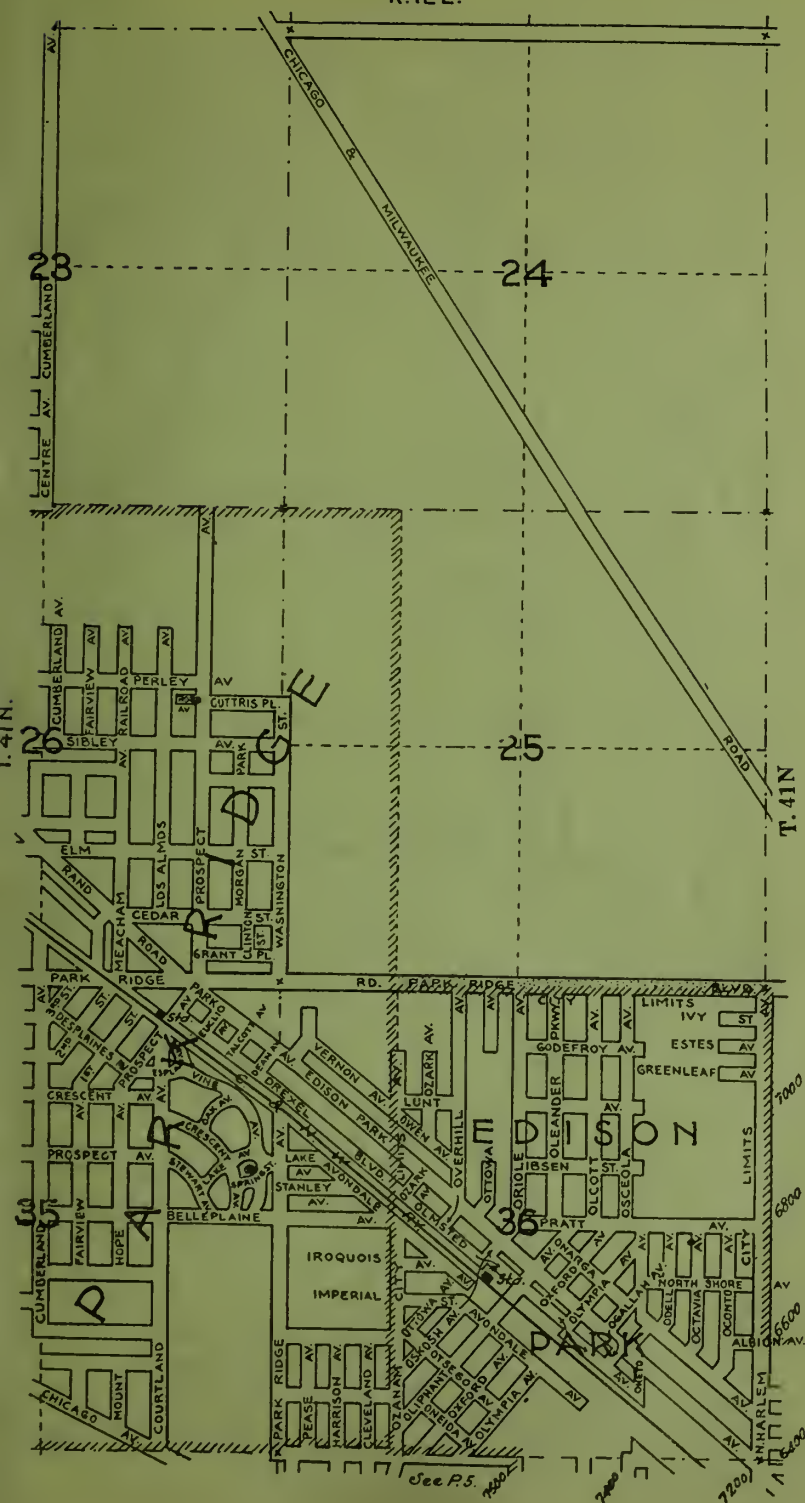

Understand, the scheme has been only partly adopted; in later days should a change of street names be made there is no doubt that the changes will be made with the object in view of conforming to the plans already started. In addition to the above, where new names are assigned North and South highways will be called Avenues and Courts and East and West highways will be called Streets and Places.

CHICAGO AT A GLANCE

City organized in 1837; population then, 4,175; area 10 square miles.

Fort Dearborn, located at the River and N. Michigan avenue, marks the oldest and first occupied spot by white people.

Indians massacred white settlers at 18th street and Calumet avenue, August, 1812.

Present area 193 square miles, with population of over 2,400,000.

Geographical center of the city is at West 39th street and South Ashland avenue.

Natural surface above the Lake is 10 feet.

Lake Michigan's first harbor was established March 2d, 1833.

Chicago's big fire started October 8th, 1871, and within thirty-six hours 200 person perished, 18,000 buildings, with an approximate value of over \$200,000,000, were destroyed.

New York is 908 miles away; by rail only 20 hours.

San Francisco, 2,272 miles; by rail only 96 hours.

Chicago is only 79 years old and ranks as the fourth largest city in the world. Ground lying east of Halsted street and near Madison sold for less than \$7.00 per acre. Now worth over \$15,000 per foot.

Public transportation was first provided by Mr. Frank Parmelee by omnibus in 1853. Horse-drawn street cars appeared in 1859. Cable cars first operated in 1882 and the electric cars appeared in 1890. The elevated railroad was first operated by steam in 1892 and changed to electric operation in 1898.

Over 150,000 miles of railroads center in Chicago; six big terminals, with over 90 way stations, are within the city limits for local travel.

The combined space occupied by Washington, Lincoln, Garfield, Grant, Jackson, Humboldt, McKinley, and Marquette Parks is over 2,425 acres.

Small parks and playgrounds occupy over 1,937 acres of ground.

Chicago has over 11,755 miles of boulevard driveways; 3,098 miles of streets, of which over 2,060 miles are paved.

There are over 27,000 employees on the city payroll.

Ten water pumping stations supply over 360,000,000 gallons of water through 1,500 miles of main and connecting pipes.

The sanitary district was organized in 1890. After ten years' work the current of the Chicago River was reversed and made to flow through the Illinois to the Mississippi River.

THE FAMOUS STARCK PIANO

**Sweet-Toned
Guaranteed 25 Years**

Select your piano for its tone quality. Starck pianos are not only beautiful pianos, but more than this, they are scientifically constructed so that each separate part of the piano performs its own work in producing a tone of marvelous sweetness, purity and power. You will be delighted with the matchless tone quality of the Starck. Every Starck piano is guaranteed

for 25 years. This guarantee has back of it the reputation of an old-established, responsible piano house. It means what it says and assures you a satisfactory piano.

30 Days' Free Trial

You can have a beautiful Starck piano in your own home for 30 days' free trial. If, at the end of that time, you do not find it the highest grade, sweetest-toned and finest piano in every way that you have ever seen for the money you are at perfect liberty to send it back, and the trial will have cost you nothing. The Starck piano must make good with you, or there is no sale.

The Celebrated Starck Player-Piano

Lovers of music who are not musicians can render on the Starck player-piano any favorite selection with just as good expression as the composer himself. Being simple to understand, easy to operate, and durable in construction, the Starck player-piano meets the demand for a reliable, high-grade player-piano at a reasonable price. Call at our salesrooms and let us demonstrate this wonderful instrument.
